Everywhere App by zenon

The HMI/SCADA App for your Smartphone

Real-time data from your HMI/SCADA system directly on your Smartphone. With Everywhere App by zenon you have your equipment under control from wherever you may be - in the meeting room, on the way to work, or at the airport. Guarantee that your equipment will run with optimum efficiency and productivity, even when you happen to be on the road.

QUICK TO ACTIVATE

Uncomplicated and quick to activate: In a few seconds you can establish a connection to your zenon HMI/SCADA system. You can browse through your equipment models and choose the required information you would like to display. You already have an overview of real-time data and can receive alarm messages on your Smartphone screen without delay.

SYSTEMS

The Everywhere App is available for Windows Phone and iOS. Just download from your App store for free and start up. You can receive the installation details on your zenon Runtime computer from your zenon Sales Representative.

FEATURES

▸ Real-time display of values in a zenon project
▸ Authentication using zenon user administration
▸ Choice of equipment models for the active project
▸ Variables can be individually activated
▸ Display of values
  ▸ in lists
  ▸ with graphical progress bars
  ▸ with dynamic gauge elements
▸ Alarm messages with time of occurrence

SECURITY

Important for the security of your equipment: Everywhere App by zenon just allows read-only access to your zenon HMI/SCADA system. For communication with the Everywhere App the Everywhere Server is installed together with the zenon Runtime.
